

INTERNATIONAL

INVITED SESSION SUMMARY

Title of Session:

Knowledge Engineering in Large-Scale Systems

Name, Title and Affiliation of Chair:

Prof. Dr. Sergey V. Zykov

- **National Research University – Higher School of Economics, Russia**
- **MEPhI National Nuclear Research University, Russia**

Details of Session (including aim and scope):

Knowledge engineering assists in a number of problems. The focus of the invited session is large-scale systems development based on knowledge engineering. The engineering processes include a number of aspects, such as knowledge acquisition, representation and management. In large-scale systems, knowledge engineering often becomes mission-critical.

Advances in knowledge engineering provide better quality of large-scale systems, specifically enterprise systems, and make them more efficient. Papers are invited on the recent theoretical and practical findings in knowledge engineering and large-scale systems.

The topics include but are not limited to:

- Knowledge Engineering
- Knowledge Acquisition
- Knowledge Representation
- Knowledge Management
- System Engineering
- Quality Engineering
- Enterprise Engineering
- Enterprise Systems Development
- Enterprise Applications Integration
- Enterprise Content Management
- Domain Analysis and Modeling
- Human-Machine Cooperation
- Integration and Interoperability
- Business Process Management
- Education and Training
- Applications and Case Studies

Main Contributing Researchers / Research Centres (tentative, if known at this stage):
